

Investment Casting

Lose your worries through *Lost Wax Process* !

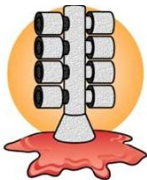

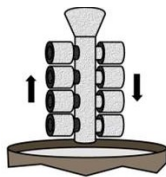

The Process

Mold Wax pattern

Make Wax pattern Tree

ceramic slurry dip

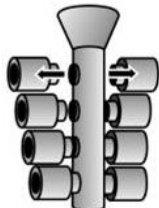

De-Wax

Pre-heat shell and pour metal

Break shell

Break parts off the tree

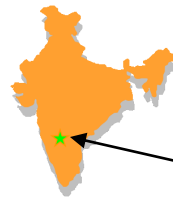

Finished part

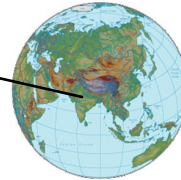

Established in 2009, with state of the art equipments imported from USA, Canada and Australia

Managed by experienced metallurgists and engineers with 100+ years of combined experience, Gowri Ventures aspires to be among world's leading IC company in five years

Located in South East part of India

Gowri Ventures is a group company of Indo-US MIM Tec. Indo-MIM is among top five MIM companies in the world manufacturing small intricate steel and stainless steel components through Metal Injection Molding Process.

Complete solution provider including in-house product engineering, tooling, precision CNC finish machining

Sales and customer support centers in USA and Europe

Capabilities

- 0.05~ 5.0 lbs part weight
- Complete solution provider including in-house design, tooling, precision CNC finish machining
- Full pledged engineering and after sales support from US locations
- 10,000 pcs~250,000 pcs volume/year capable
- Materials offered
 - Carbon Steels
 - Low Alloy Steels
 - 400 series, 300 series stainless steels
 - Precipitation hardening stainless steels
 - Nickel and Cobalt based alloys
 - Vacuum melting capability for Ti and Super Alloys by 2010
